PROFILE

Senior Gameplay Programmer with 4+ years in games and 13 years in professional software engineering. Shipped three commercial titles in Unity/C# — Prime Monster, Ticket to Ride and Mouse Trap — across PC, mobile, Nintendo Switch, PlayStation and Xbox.

Brings enterprise discipline to game teams: TDD, CI pipelines, scalable architecture and code review, honed building services for millions of users at Sky. Happiest in small, tight-knit teams, owning systems from prototype to release.

SHIPPED TITLES

Prime Monster Card-based roguelike · Steam	Ticket to Ride Board game adaptation · Steam, iOS, Android	Mouse Trap Mobile, Steam, Switch, PlayStation, Xbox
--	--	---

CORE SKILLS

Languages	C#, Java, JavaScript, SQL / CQL
Engines & frameworks	Unity, Photon (networking), LibGDX, Spring, Dropwizard
Gameplay systems	UI, save/load & cloud saves, meta-progression, multiplayer & lobbies, game AI, procedural generation
Platforms	PC (Steam), iOS, Android, Nintendo Switch, PlayStation, Xbox
Practices	TDD, code review, Agile, CI/CD (Jenkins), profiling & optimisation
Tools	Git, Perforce, SVN, Jenkins

EXPERIENCE

Senior Gameplay Programmer · Cavalier Game Studios Dec 2023 – Present
London, on-site · C#, Unity

- Shipped **Prime Monster** (Steam), a card-based political roguelike in Unity/C#, working across most areas of the game.
- Built the UI system and implemented artists' designs in-engine.
- Owned core gameplay systems including save/load, meta-progression and gameplay logic.
- Set up Jenkins CI to build the game and run automated tests continuously.

Gameplay Programmer · Marmalade Game Studio Jun 2022 – Nov 2023
London · C#, Unity

- Shipped digital adaptations of **Mouse Trap** and **Ticket to Ride**, taking features from prototype to release in Unity/C#.
- Built Mouse Trap's single/multiplayer framework, lobby system (Photon) and AI opponents with difficulty levels.
- Created a custom cross-platform cloud save solution and a meta-progression system.
- Released on Google Play and the App Store (4.8/5 rating) and Steam; ported to Nintendo Switch, PlayStation and Xbox.
- Built Ticket to Ride's custom equipment/cosmetics system and helped port it to iOS and Android.
- Worked closely with designers, UI and 3D artists; reviewed code for junior and senior programmers.

Freelance Mentor · Codementor Feb 2022 – Jun 2022
Remote

- Mentored developers in web and general software development, unit testing, architecture and pipeline design.

Senior Software Developer · Sky

Nov 2017 – Dec 2021

London · Java, Dropwizard, Spring, Cassandra

- Designed and built Java microservices (Dropwizard, Spring) for the Sky Online Video Platform.
- Scaled and optimised services to handle up to 4,000 transactions per second.
- Designed scalable Cassandra CQL schemas and queries.
- Continuously deployed live services to millions of users with 99.99% uptime, using TDD throughout.

Software Developer · Secret Escapes

Jul 2015 – Sep 2017

London · Groovy/Grails, JavaScript

- Developed the Secret Escapes e-commerce site as a full-stack developer using TDD, pair programming and code review.
- Handled live deployments and urgent site issues, and improved the release process.

Software Developer · Wincor Nixdorf (via FDM Group)

Nov 2013 – Jun 2015

Bracknell · Java

- Developed an enterprise Java thin-client application for ATM machines.
- Demoed work to external clients every sprint and helped the team move from Waterfall to Agile.

PERSONAL & GAME JAM PROJECTS

Rogue Dungeon

Solo · Action roguelite

- Procedurally generated levels, items and spells; extendable spell system built on Scriptable Objects; NavMesh enemy AI; Wave Function Collapse for floor and wall decoration.

Corgi, protecc!

Ludum Dare 50 · Team of 4

- Top-down wave shooter built in 72 hours; placed 219th of ~2,000 entries.

Last Online: 2734 Days Ago

Wholesome Game Jam · Team of 4

- Branching dialogue, a fishing mini-game and a combat trial, built in 48 hours.

Robo Rush

Solo · 2D side-scroller

- Infinite runner ported to Android and optimised with the Unity profiler.

EDUCATION & TRAINING

BA Geography, 2:1 · King's College London

2010 – 2013

3 A Levels (A, B, B) · **10 GCSEs** (1 A*, 7 A, 2 B) · City of London School for Boys

2003 – 2008

Gameplay programming mentorship (Unity/C#) · Mastered

2022

Graduate Java training: Java, Spring, SQL, Unix/Linux · FDM Group

2013

INTERESTS

Roguelikes, RTS games and Super Smash Bros — a lifelong gamer since Zelda on the N64 and Age of Empires 2.
